

Glass media installation CLX2

- Unplug the Halo backlight from the right side of the firebox. (If you didn't purchase this upgrade, skip this and move to the next step.)
- Remove the glass face from the unit. Face lifts up and away from the firebox.
- Remove the coal bed. Coal bed will simply lift up and out of the media tray.
- Place the thin grey plastic strip in the media tray. Should be elevated slightly in the rear of the tray.
- Place glass media in media tray on top of the grey plastic.
- Replace glass face.
